

To Whom It May Concern:I use the Traffic and Weather channel on my XM Radio everyday and can not imagine driving again without it. My trip is 70 miles one way through some of the fiercest traffic this country has to offer. I drive to Los Angeles and take 3 different major freeways. I live in the mountains where there is snow and when there is bad weather, sometimes the freeway is shut down. I depend on accurate up to date traffic and weather reports to get me home safely. Please reject the NAB's petition 04-160 without hesitation.

Sincerely yours,

Aaron Weisblatt
